

Derrick (DJ) Louis

dlouis32@gatech.edu | +1 (678) 852 - 6369 | Atlanta, GA | [in/dj-louis](#) | [G/derrickLouis](#)

Education

Georgia Institute of Technology

Bachelor of Science in Computer Science

Expected May 2027

Atlanta, GA

- Coursework: DSA, OOP, Design Analysis & Algorithms, Artificial Intelligence, Computer Organization

LinkedIn Possibilities in Tech Scholar

June 2023 - Present

- Received \$10,000 annually for 4 years to pursue my education
- Appointed 2 LinkedIn Senior Software Engineering mentors
- Apart of the first 25 person cohort where each person is pushed to constantly learn new skills and practices at LinkedIn
- Participating in various coding challenges to learn and sharpen programming and problem-solving skills

Technical Skills

Languages / Frameworks

Python, Java, C, Git, Microsoft SQL Server, Java Spring Boot, MyBatis

Practices

Agile Development, MVVM Structure, Commenting, Unit Tests, Version Control, Code Review

Other

Visual Studio Code, IntelliJ, Slack, Jira, GitHub, Docker, Prompt Engineering, Microsoft Office, Google Suite, MacOS, Windows, Linux

Work Experience

PrimeRevenue | Software Engineering Intern {Spring Boot, Git, Docker, Java, Microsoft SQL Server, Jira, Slack} May 2025 - Present

- Responsible for the transition and development of legacy SQL Server to **Java Spring Boot** on PR's Trading Configuration team
- Utilized multiple technologies to develop an internal **API** to pave the way for the future onboarding of a frontend development team
- Independently** owned development tasks from coding through review, **QA**, and production, consistently delivering **production-level** features on a weekly basis that directly advanced company objectives leveraging **Git/GitHub** for version control.
- Developed an **agent** for developers to streamline their **JUnit** test development and cut down time taken on endpoint tests by 90%
- Worked with international developers to ensure consistent thoughts and processes **globally**
- Contributed as one of only three developers in the Atlanta office.

Georgia Institute of Technology | IT Student Assistant

October 2023 - May 2025

- Managed personal faculty devices as well as classroom devices, by registering new devices onto the Georgia Tech network, ensuring seamless connectivity and functionality.
- Demonstrated proficiency in handling diverse operating systems, including Mac OS, Windows, and Linux, troubleshooting issues, and providing technical support to faculty members.
- Maintained an accurate inventory of devices and equipment, ensuring that surplus devices were properly assessed, functional, and prepared for disposal, contributing to the efficient operation of the IT infrastructure at Georgia Tech.

Websanity LWC | Founder / Designer

March 2022 - Present

- Founded and scaled a freelance web design agency, acquiring 3+ monthly clients and generating steady recurring revenue.
- Designed affordable websites for startups, enhancing client visibility while managing end-to-end development and client relationships.

Development Projects

LinkedIn Email Submission Implementation [Hackathon] {Python, HTML, CSS, Django}

June 2024

- Developed a Python/Django feature to **automate** email submission on LinkedIn's social feed, improving user experience by keeping the comment section dedicated to genuine inquiries.
- Provided a mock **API** to simulate users on the LinkedIn platform
- Collaborated with scholarship winners at LinkedIn's inaugural hackathon, using HTML and CSS for the solution at their headquarters

Collaborative Travel Management System [Class Lab] {Java, Android Studio, Firebase, MVVM, Agile}

December 2024

- Designed a collaborative travel app leveraging the **MVVM design pattern** for streamlined data handling and UI management.
- Spearheaded **Agile sprint cycles**, delivering iterative enhancements including real-time itinerary updates and collaborative trip planning.
- Designed **user-friendly interfaces** with XML, incorporating dynamic forms and navigation elements for intuitive user interaction.
- Developed Java backend with Firebase to store users' destinations, accommodations, and notes, ensuring **seamless data synchronization**.
- Implemented functionality to allow contributors to view and manage trip details without authentication overhead.
- Integrated **Firebase database** for efficient storage of travel plans, utilizing SharedPreferences to retain user-specific data across sessions.
- Utilized **GitHub for version control**, enabling collaborative development, code reviews, and efficient integration of new features.

AI Stock Price Prediction Model [Personal] {Python, Keras, TensorFlow, Alpha Vantage API, StreamLit}

October 2023

- Developed Ai Prediction Model to estimate future closing stock prices using **Alpha Vantage API**
- Created a user interface for easy interaction with the prediction model using Python's streamlit library

Leadership Experience

Northside Surge | Coach

August 2024 - Present

- Coached and mentored lacrosse players in grades 1-5, focusing on skill development and teamwork.
- Helped develop athletes who advanced to competitive high school programs.
- Balanced coaching responsibilities while competing as a player on Georgia Tech's YellowJackets.

Books for Africa

February 2024 - March 2025

- Sorted, organized, and packaged over 1,000 donated books for shipment to underserved regions in Africa.
- Played a role in expanding access to literacy and education, making an impact on learning opportunities in African regions.
